TIME PERIODS FOR FILING A REPLY TO THIS NOTICE:

1. Applicant is given **no new time period** if the non-compliant amendment is an after-final amendment or an amendment filed after allowance. If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the **entire corrected amendment** must be resubmitted.
2. Applicant is given **one month**, or thirty (30) days, whichever is longer, from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a Quayle action. If any of above boxes 1. to 4. are checked, the correction required is only the **corrected section** of the non-compliant amendment in compliance with 37 CFR 1.121.

Extensions of time are available under 37 CFR 1.136(a) **only** if the non-compliant amendment is a non-final amendment or an amendment filed in response to a Quayle action.

DETAILED ACTION

Response to Amendment

1. The reply filed on 12-21-2005 is non-compliant because of the following omission(s) or matter(s):
 - I. The amendment to the specification is non-compliant because applicants fail to show the full text of any replacement paragraph with markings to show all the changes relative to the previous version of the paragraph (emphasis added). The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. Note: The examiner recognizes that applicants submit plurality different version of the specification. However, at least one version of the amended Specification is non-compliant. The applicants are advised to submit only one compliant version of the amended specification.
 - II. The applicants label an "Amendment to the Drawings" in the paper filed on 12-21-2005. In the section, the applicants amended the paragraph [0038], [0040]. Paragraph [0038] is a brief description of the drawing which is a part of the specification. Paragraph [0040] is the detail description of the drawing which is a part of the specification. The label "Amendment to the Drawings" is improper because the applicants did not amend the actual drawing themselves (i.e. made a change to Figure 1 and 2). This should be part of the amendment to the specification.

Art Unit: 1765

III. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Note: The examiner clearly recognizes that applicants submit two different versions of the claims, specification, abstract. The examiner also recognizes that one version of the amended claims is a proper format. However in another version, applicants number the new added claims as claims 1-21. This is improper because claims 1-8 have been canceled by applicants. Again, the applicants are advised to submit only one correct version of the claims, specification, and abstract.

2. For further explanation of the amendment format required by 37 CFR 1.121, see MPEP §714.

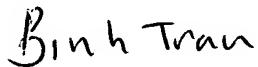

3. Applicant is give one month, or thirty (30) days, whichever is longer, from the mail date of this notice to supply the correction
